HOTEL AND RESORT MANAGERS: LET YOUR GUESTS BREATHE EASIER.

What's circulating in your hotel? Poor air quality? Negative guest experiences? Exorbitant energy bills? ServiceMaster Clean® can help by providing state-of-the-art cleaning of your Packaged Terminal Air Conditioning (PTAC) units.

ServiceMaster Clean utilizes a ChemTron treatment process that includes completely cleaning each unit, including coils, pan, blower and filter. This process is approved by the Green Clean Institute, an independent certification entity serving the janitorial cleaning industry.

This professional cleaning helps ensure a pleasant experience for patrons by helping to improve the hotel air quality. Best of all, your PTAC systems will run more efficiently, helping to lower your property's energy consumption and costs. It's energy conservation that pays you back NOW, and later.

EXTRAORDINARY SERVICE? BE OUR GUEST.

ServiceMaster Clean has been an industry leader in specialty cleaning for the hospitality industry for more than 50 years. Our highly trained, thoroughly screened professionals offer dedicated service that goes above and beyond the standard of care you expect. While constant accessibility and clear communication ensure we do the job right the first time, every time.

THE BENEFITS FOR YOUR HOTEL

PTAC cleaning from ServiceMaster Clean can:

- ▶ Improve indoor air quality
- ▶ Save energy—potentially by as much as 31%
- ▶ Lower utility bills
- ▶ Offer a significant return on investment
- ▶ Reduce replacement costs
- ▶ Help you avoid costly repairs
- ▶ Provide health benefits for allergy and asthma sufferers
- ▶ Result in higher guest satisfaction scores
